

Lectern A/V Training Guide

Getting Started

- **First time?** We recommend starting with the **Lectern PC** or **Lectern Mac** to get comfortable with the system before trying your own device.
- Once you're comfortable with the Lectern PC or Mac, feel free to try connecting your own laptop, phone, or tablet.

What to Expect

- At this time, **one device** can be displayed at a time. Your content will appear on **all three TVs** and the **lectern monitor** simultaneously.
- We are currently not showing different devices on different TVs.

Important Tips

- When tapping the **ClickShare touch panel** or any button on the **audio console**, always use a **gentle tap** — not a long press.
- A long press may trigger a different menu or setting than the one you need.
